Full-stack developer building AI-native, real-time web products on Next.js/React and Go/Node backends. Recent focus: shipping an AI hiring platform with an MCP-based chatbot integration and a multi-store commerce analytics OS — owning frontend architecture, backend services, and AI-driven feature integration end-to-end.

SKILLS

Languages: TypeScript / JavaScript, Python, Java, Go

Frontend: React.js, Next.js, TanStack Query/Table, Redux, Zustand, Tailwind CSS, ShadCN UI, Vite

Backend: Node.js, Express, PostgreSQL, MongoDB, Drizzle, REST APIs, GraphQL APIs, WebSockets

AI / Agent: MCP server development, LLM-powered feature integration, AI chatbot design

Tools: Git, GitHub, Docker, AWS (EC2, S3), Postman

EXPERIENCE

Full Stack Developer

Jan 2026 – Present

Axe Consultancy Services

Dehradun, India

- Own end-to-end development of production web applications across frontend, backend, APIs, and databases.
- Design and ship scalable product features, owning architecture and implementation from development through deployment.
- Build AI-powered features and MCP integrations that let users interact with core product functionality through AI agents.

Frontend Developer

Feb 2025 – Dec 2025

Whatbytes

Remote

- Built a travel-booking platform enabling suppliers to list hotels, attractions, and packages, and agents to book them for their organizations.
- Built and maintained 30+ filterable data tables covering bookings, transactions, hotels, attractions, and packages.
- Integrated an AI-powered generator letting suppliers create attraction listings from a single text prompt.

Next.js, React, Tailwind CSS, ShadCN UI, Zustand

Full Stack Web Developer (Intern)

2023

Unfluke

Remote

- Contributed to an options trading platform — building core trading workflows, market-analysis features, and user-facing tools for analyzing and executing options strategies.

PROJECTS

11Jobs 11jobs.in — AI-driven hiring assessment platform

- Built the core hiring assessment experience end-to-end, including a customizable assessment workflow builder and recruiter/candidate portals.
- Shipped 30+ assessment management views along with automated proctoring and cheating detection.
- Built an MCP server exposing platform actions for AI-driven assignment creation and management through chat.

React, TypeScript, TanStack Query/Table, ShadCN UI, MCP

11Matrix 11matrix.co — Unified commerce & analytics OS

- Building a unified Shopify commerce platform for multi-store analytics, marketing, operations, and support; own the React Router frontend and the Go/Gin/PostgreSQL backend.
- Independently developing core APIs, ticket generation, Shopify integrations, and the MCP integration layer.

React, TanStack Query/Table, ShadCN UI, Zustand, Go, Gin, PostgreSQL, MCP, Docker

SureGem suregem.com — Multi-vendor diamond & fine-jewelry marketplace

- Built the frontend and end-to-end application flow for a B2B marketplace connecting diamond and fine-jewelry suppliers with buyers.
- Covered product discovery, advanced search and filtering, vendor catalogs, product details, inquiries, and orders.

EDUCATION

M.C.A, Uttarakhand University (8.4 CGPA)

2023 – 2025

Bachelor of Computer Science, Doon University

2020 – 2023
